ABOUT US

Jjenga Code provides high-impact digital skills programs for children and teens. We work with parents, schools, churches, and community organizations to deliver hands-on learning in coding, robotics, and digital literacy. Our approach is practical, engaging, and tailored to build real-world skills in young learners. Whether you want to enroll one child or book a full group program, our team is here to support you every step of the way

JJENGA CODE

TURNING TECH CURIOSITY INTO CREATIVE CONFIDENCE

WHY CHOOSE US

We're here to help your child or student group build real tech skills. You can join Jjenga Code by registering for our coding bootcamps, digital workshops, or school based programs. Whether you're a parent, school, or youth leader, our team is ready to walk with you every step of the waY.

BOOK A PROGRAM

Looking to host a tech event, school holiday program, or digital skills session? Jjenga Code offers flexible, high-impact programs tailored to your needs. Our curriculum is hands-on, age-appropriate, and designed to spark curiosity and creativity

WHAT WE OFFER

We provide fun, hands-on tech programs for children and teens, including coding, robotics, and digital skills delivered in schools, communities, and group sessions.

01

Digital Skills Bootcamps

Weekend and holiday coding camps for children aged 8–17, covering programming, robotics, and creative tech.

02

School Programs

Custom in-school and after-school programs aligned with Kenya's Competency-Based Education (CBE) and global best practices.

03

Workshops & Events

One-time tech activations, church group trainings, coding challenges, and more.

04

Printed Learning Booklets

Our courses come with printed, step-by-step materials designed to support self-paced learning and classroom engagement
